Sara (Trees) Lott joined eLS in May 2024, and is the lead contact to LAS and FYE. We are happy to have Sara as part of our eLS team!

Panopto is Here!

eLearning Services is excited to bring you the [Panopto](#) video platform! This video creation and hosting tool offers a number of great features, including:

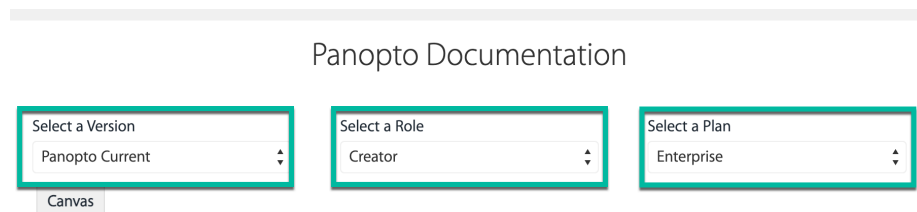

- Record and edit videos directly in Canvas
- Generate and edit auto-captions within Canvas
- Provide quizzing during video playback
- Disable video “skimming” and track student viewing habits
- Jump to specific points in a video using key-word search
- Share video content between courses and Canvas users
- Import existing videos (from Youtube, Snagit, etc) to utilize all of Panopto’s features

The integration of Panopto into Canvas will eliminate the previous process of recording instructor-created videos in Snagit, sharing to YouTube, creating/editing closed captions in YouTube, then embedding the video into Canvas. Panopto is a one-stop-shop integrated directly into Canvas!

How do I use Panopto?

You can start using Panopto today. The best way to get started is to view the [Panopto Documentation webpage](#), and select Version “Panopto Current,” select Role “Creator,” and select Plan “Enterprise.” This will give you tutorials on all things Panopto.

At division meetings starting Fall 2024, your Instructional Designer will give you an overview of the Panopto tools and tips to get started. eLearning will also host workshops in coordination with the Center for Teaching and Learning (CTL) on Panopto. The dates and locations of those workshops will be provided in future eBytes as well as through communications from the CTL. If you have specific questions regarding Panopto now, please reach out to your Instructional Designer directly.
